SKILLS

Javascript • Typescript • Node.js • Angular • React • Redux • Redux Saga • Angular • RxJS • Express • jQuery •Ionic • Boot-Strap • Semantic • React Native • Responsive Design • Git • REST API • GraphQL • iOS • Android • SQL • NoSQL • MySQL

EDUCATION

BRITISH COLUMBIA INSTITUTE OF TECHNOLOGY

Diploma, Computer Systems
Grad, May 2022 | CGPA: 3.83

DANKOOK UNIVERSITY

BSc, Economics
Grad, Aug 2018 | Major GPA: 3.98

EXPERIENCE

STRIVE GAMING | Web Developer | Full Time

July 2022 – Current | CA, Vancouver

- Implement Node express into front end project to distribute several franchises.
- Integrated CMS to edit contents via CMS API
- Injected several 3rd party integration dynamically, for instance, GoogleTag, FullStory, Extreme Push, ChalkLine, and etc.
- Adapting Docker containers for AMD64 processors to work in ARM64 environments.
- Create and maintain Restful APIs with Ruby on Rails

DFRC | Front End Developer | Full Time

Jan 2019 - March 2021 | South Korea, Seoul

- Built a DFRC Data Management Web Applications. Displayed DFRC's data using the RESTUL API. Generated and modified data without DB access through various interaction elements which has asynchronous operations using RxJS observable.
- Created a dashboard web application of Daebo via ReactJS. Performed state management through Redux and Redux Saga. Secured data safety using immutable JS. Strengthened UI/UX with Semantic UI.
- Transitioned mobile applications written in the existing Objective-C to applications for Android and iOS through React Native.
- Enhanced UI/UX with SASS and replaced old and wordy CSS file.

PROJECT

STRIVE GAMING PLATFORMS | Typescript, React, Ruby on Rails, Restful API, MySQL, Docker

- Developed Several iGaming Platform Web Application. using Typescript, React.
- Maintained Restful API with Ruby on Rails with Docker environment.
- Create and maintain APIs that fetch values from a MySQL DB and return the values requested by a Restful API.
- Developing in the Docker environment and creating multiplatform containers so that containers created on AMD64 can run on ARM64.

DFRC MANAGEMENT DASH BOARD | Typescript, Angular, RxJS, HTML, SASS, Ionic, React JS, Redux, Redux Saga,React Native

- Maintained DFRC Data Management Web Application site using Typescript, Angular, and RxJS. Used Google Graph API to informatize and display existing data.
- Configured responsive web applications using Ionic. Different sizes of screens are applied contextually using the @media tag.
- Shortened loading time of Web Applications from 7 seconds to around 3 seconds using Lazy Loading and Angular Life Cycle.
- Prevented CORS errors during development using a proxy server.
- Used Redux for React State management. Secured state with Immutable JS for integrity. Implemented Redux Saga to receive data from REST API and transfer that information to Redux.
